

Regulatory Compliance in Utilities Capital Program Management Processes

Ensuring regulatory compliance is a must for every [utility construction project](#). That's no easy task, as utilities are among the most regulated industries in the United States and across the world.

Managers of utilities construction projects must deal with ever-changing laws, regulations and guidelines from the Environmental Protection Agency, Federal Energy Regulatory Commission, Public Utility Commission and North American Electric Reliability Corporation, in addition to other local, state and federal agencies.

Utility services must remain online for consumers, even as agencies tackle new projects to create future access and growth. While it can seem a daunting requirement, ensuring compliance under these rigorous conditions is imperative for the safety of the project and the community at large.

With a single [program management information solution](#) (PMIS), changes to processes can be automated and enforced delivering standard project planning, execution and commissioning practices, allowing utilities agencies to substantiate capital project compliance and mitigate legal and financial penalties.

To ensure regulatory compliance across all programs while tackling these sometimes-massive capital projects, agencies need a cloud-based PMIS platform that:

- Centralizes location for all project-related processes, communication and information
- Establishes a project record for a single source of truth across projects and programs
- Integrate auditing and controls capabilities across the project portfolio
- Provides visibility, transparency and reporting to identify and mitigate risks

The Kahua platform provides that for utilities projects ... and more. The intuitive, robust and secure solution helps manage capital improvement plans, programs and projects to impact performance and efficiency, consolidate point solutions and stay connected in the field.

Choose Kahua

Kahua is a leading provider of capital program and construction project management software, enabling innovation that is changing the way that capital programs are planned and delivered. Kahua's purpose-built solutions for owners, program managers and contractors enable rapid implementation that minimizes time-to-value and enhances user adoption. And with the industry's only low-code application platform, customers can easily customize existing Kahua apps or even build their own new apps to run their business at peak efficiency today and rapidly adapt as business conditions dictate.
