General Services Administration

8,800 Assets Over More than 370 Million Square Feet for 1.1 Million Federal Employees

Capital Programs Team - Approx. 7,000 Users

Kahua Federal Network PMIS Platform

FR FedRAMP

Reduced Footprint with 16 New Process and 25 Integrations with Legacy Systems

Project Scope

7 Teams consisting of Kahua, Runding & Centrenium

12-month contract schedule to go live, Agile Management

24 Integrations with 10 unique systems

2-month migration of 2,400 existing data and projects

Why Kahua

Flexible and agile platform that would conform to the specific workflows and business processes defined by the agency

Consolidate multiple point solutions and integrate data from other agency databases, users would now have a single login

Eliminate duplicate data entry and user error and provide a single point of truth for all programs run by the agency

Kahua for Government

Kahua's capital program and project management solutions provide collaboration, transparency, security and accountability to increase efficiency and reduce risk on federal, state, and local government construction projects. Kahua's system provides ease of use and flexibility to effectively manage the entire lifecycle of public sector capital programs.
