

Kahua's Powerful Common Data Environment Transforms Project Delivery Capabilities

The construction industry presents unique challenges in delivering capital projects successfully. Pulling together large teams of project, commercial, information and field managers as well as designers, contractors, and suppliers to deliver the project on time, on budget - and with the expected quality and function is no mean feat.

With ever-increasing expectations, unique contractual obligations and an ever-changing regulatory landscape, your challenges are only getting harder. Success requires a flexible, agile and scalable Common Data Environment (CDE).

What is Kahua?

Kahua is a project and programme delivery solution that provides an integrated CDE that supports project, commercial, cost, information and field management functionalities. Kahua's [flexible](#), agile and scalable platform helps organizations manage construction project costs, documents and processes to deliver successful projects and programmes.

Why Choose Kahua?

Manage Risk:

- Minimise errors and reworks
- Identify [risks](#) early, complete with all backups required
- Hold the entire team accountable for delivering results

Streamline Workflows:

- Find documents, data and process information and reports easily
- Manage, review and approve change seamlessly, linking the source, instructions and signature process
- Rely on powerful business processes from the office to the field
- Organize handover of digital assets including file, models, drawings, processes and data

Unify Teams:

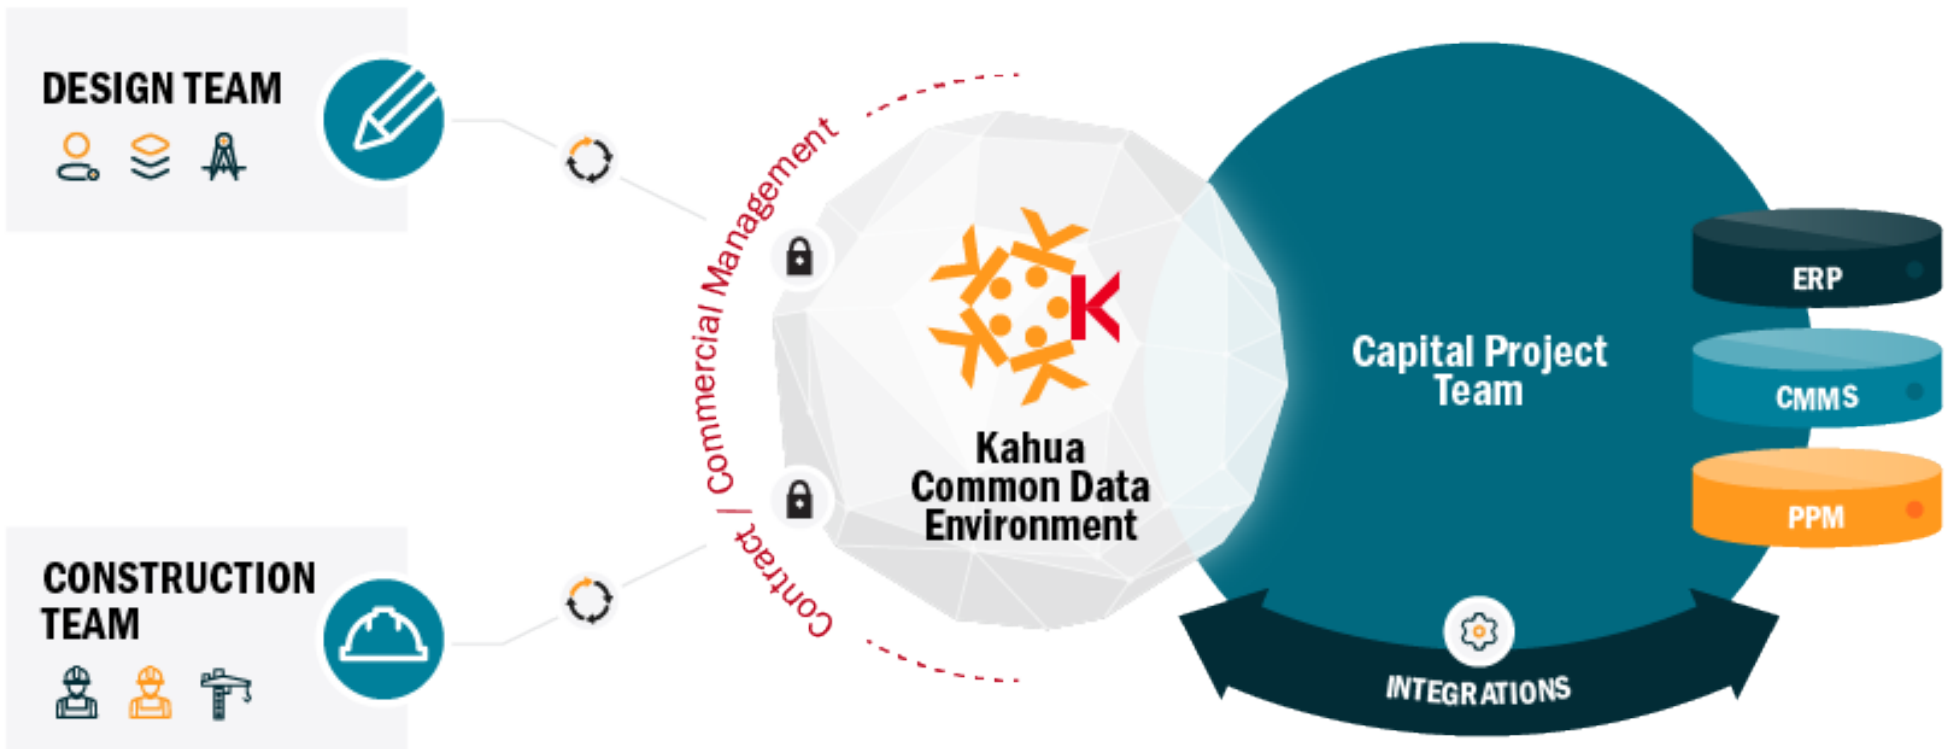

- Integrate project management, information management, commercial management and field management disciplines
- Coordinate processes across disciplines with a consistent, modern experience
- Help teams get their work done easily and efficiently

Deliver Results:

- Manage the full project lifecycle from definition to use
- Meet scope, budget, schedule, quality and safety requirements
- Leverage data with built-in reporting and dashboarding capabilities

Modernize Technology:

- Conform existing tools and add custom functionality
- [Integrate](#) existing applications with open, configurable APIs
- Strengthen data security with better control of information

“ Kahua’s integrated CDE enables project management, commercial management, information management and field management teams to streamline delivery, reduce risk and enable superior project outcomes. ”

Supporting best practices:

- UK BIM Framework
- ISO 19650

Tools designed to manage the complexities of capital projects:

- Scope Management
- Budget Management
- Time Schedule Management
- Design Management & Control
- Change Management
- Quality Management
- Environmental Health and Safety (EHS) Management
- Digital Asset Handover Management

Conform to Global business requirements:

- Multi-language
- Multi-currency
- General Data Protection Regulation (GDPR)
- Data residency
