Kahua
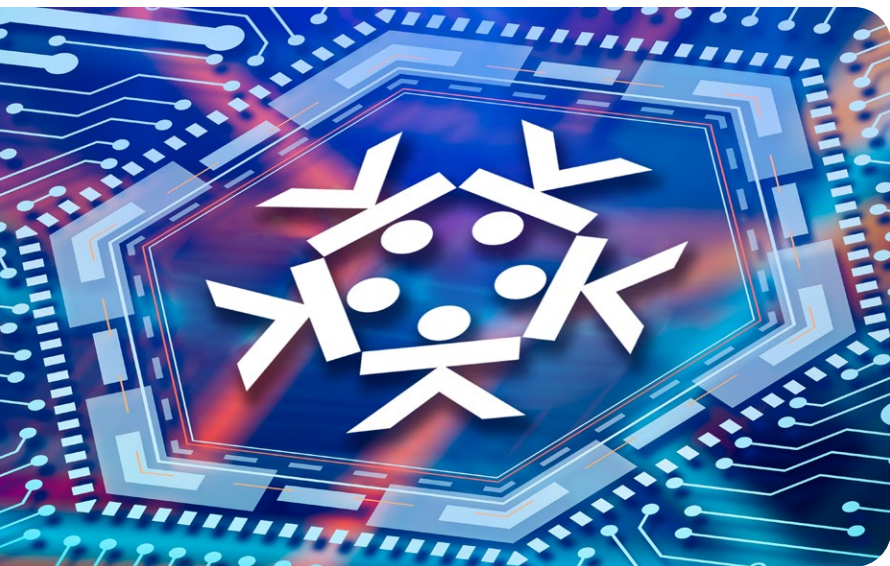

Kahua's Powerful Common Data Environment Transforms UK Project Delivery

Kahua's Common Data Environment (CDE) transforms project delivery for UK projects by ensuring compliance, security and seamless integration. In the UK construction sector, where stringent regulations and complex contractual obligations are standard, Kahua's platform offers a trusted solution to coordinate large teams of project, commercial, information and field managers, along with designers, contractors and suppliers, to deliver on time, on budget and with the expected quality and function. With ever-increasing demands, unique contractual obligations and a constantly evolving regulatory landscape, your challenges are only intensifying. Success requires a flexible, agile and scalable Common Data Environment (CDE).

What is Kahua?

Kahua is a project and programme delivery solution that provides an integrated CDE supporting project, commercial, cost, information and field management functionalities. Kahua's flexible, agile and scalable platform helps organisations manage construction project costs, documents and processes to deliver successful projects and programmes.

How Kahua Ensures Success for Your Projects

Risk Minimisation:

- Minimise errors and reworks for seamless project continuity
- Identify risks early, complete with all necessary backups
- Hold teams accountable to ensure project quality and timeliness

Modernise Technology and Strengthen Security:

- Strengthen data security with comprehensive control of information through Kahua's UK Cyber Essentials Certification and UK-based Data Centre for local data residency
- Integrate existing applications with open, configurable APIs
- Conform existing tools and add custom functionality

Efficient Workflows:

- Easily locate documents, data, process information and reports
- Seamlessly manage, review and approve changes, linking source documents, instructions and the signature process
- Rely on powerful business processes from the office to the field
- Organise digital asset handover, including files, models, drawings, processes and data
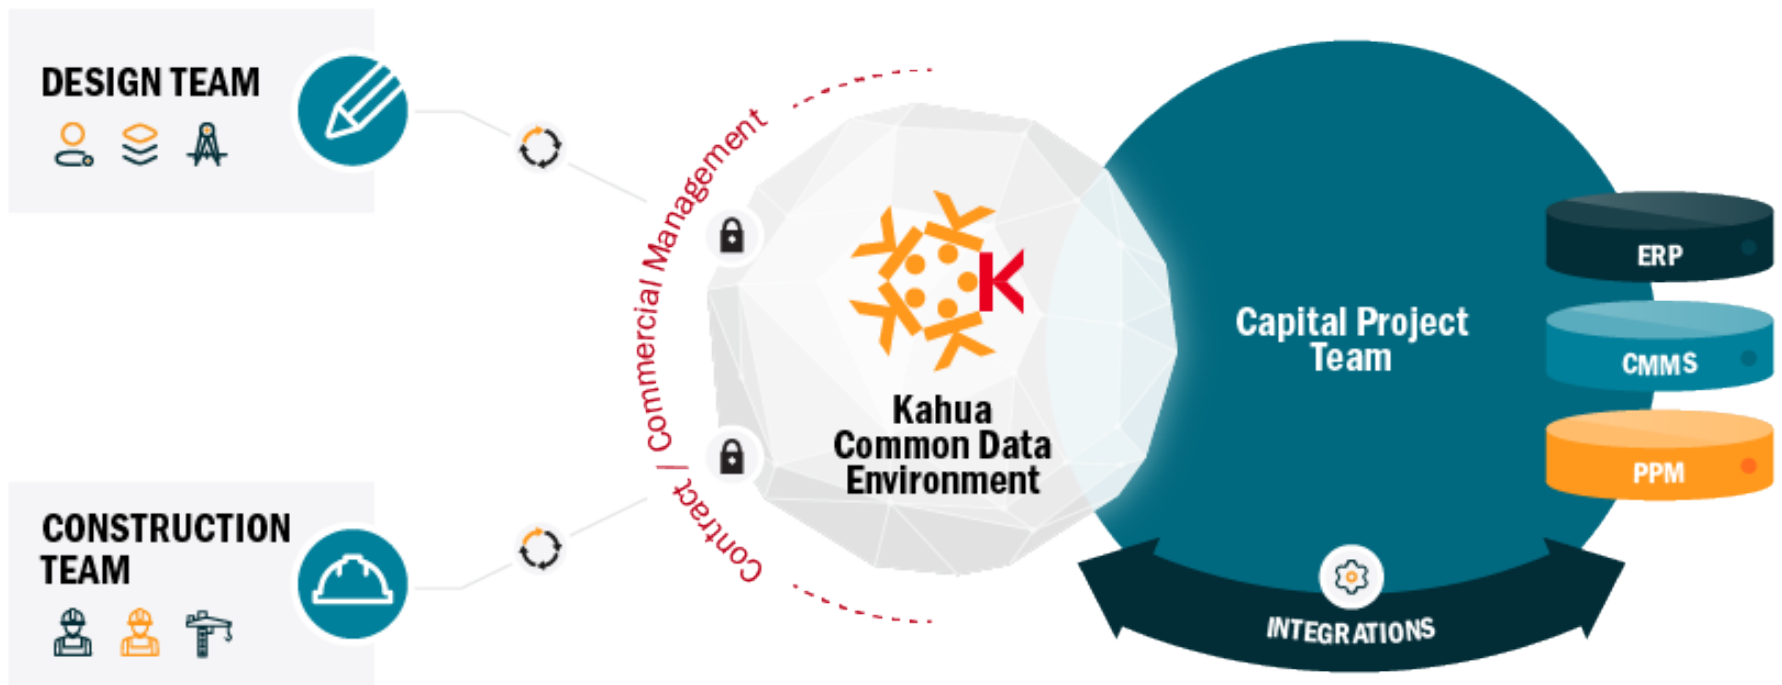

Collaborative Teamwork Across Geographies:

- Integrate project management, information management, commercial management and field management disciplines
- Coordinate processes across dispersed teams with a consistent, modern experience
- Empower teams to work smarter, reducing project delays

Deliver Results:

- Manage the full project lifecycle from definition to use
- Meet scope, budget, schedule, quality and safety requirements
- Leverage data with built-in reporting and dashboarding capabilities

Supporting UK Standards and Certifications:

- UK Cyber Essentials Certification
- UK-based Data Centre for local data residency
- UK BIM Framework
- ISO 19650 compliance

Tools Designed to Manage Capital Project Complexities:

- Scope Management
- Budget Management
- Time Schedule Management
- Design Management & Control
- Change Management
- Quality Management
- Environmental Health and Safety (EHS) Management
- Digital Asset Handover Management

Conform to Global Business Requirements:

- Multi-language support
- Multi-currency capabilities
- General Data Protection Regulation (GDPR) compliance
- Data residency options
